BUSINESS PROCESS DOCUMENTATION (for addition, modification or deletion of business process documentation language)

RECOMMENDATION TO GISB EXECUTIVE COMMITTEE

Requester: TransCapacity  Request No.: R97080

Language:
The information on the Request for Confirmation may be summarized from many nomination line items into a smaller group of line items. The summarized line item will be identified in the Request for Confirmation by the confirmation requester's tracking ID identifier. The confirmation requester's tracking ID identifier is used to uniquely identify an upstream/downstream contract, service requester contract and upstream/downstream identifier for a location and beginning and ending date/time identify a line item in the confirmation process. It is created by either the originator of the Request for Confirmation or the originator of an unsolicited Confirmation Response. It is not validated by the receiver of the document nor is it a key in the receiver of the document’s database.

(Update ‘Sample Paper Transaction’ to reflect revisions.)

Language:
When the Confirmation Response is a reply to a Request for Confirmation, the confirming party sends back the confirmation requester’s tracking ID identifier and quantity within a contract and effective date. The confirmation tracking identifier is used to identify a line item in the confirmation process. It is created by either the originator of the Request for Confirmation or the originator of an unsolicited Confirmation Response. It is not validated by the receiver of the document nor is it a key in the receiver of the document’s database. When the response is initiated by the receiving/delivering party, all of the data necessary to uniquely identify the flow of gas must be provided.

(Update ‘Sample Paper Transaction’ to reflect revisions.)

TECHNICAL CHANGE LOG (all instructions to accomplish the recommendation)

Document Name and No.: Confirmation Response (1.4.4)
Request for Confirmation (1.4.3)
Scheduled Quantity for Operator (1.4.6)

Description of Change:

Data Element Xref to X12
SI segment: Add new data element "Solicited/Unsolicited Indicator" with usage Mandatory after the Contractual Flow Indicator (to group the Mandatory data elements together).
SLN segment: Replace "Confirmation Requester’s Tracking Identifier” with “Confirmation Tracking Identifier” and change usage from C to M.

Sample X12 Transaction
Remove title (Without Utilization of the Confirmation Requester’s Tracking Identifier) from first example. Add another item to SI line for Solicited/Unsolicited Indicator: add "*SU*S" to end of SI line; make this change in both SI segments. Delete entire second example which pertained to use with a Confirmation Requester’s Tracking Identifier.
# RECOMMENDATION TO GISB EXECUTIVE COMMITTEE

**Requester:** TransCapacity  
**Request No.:** R97080

<table>
<thead>
<tr>
<th>X12 Mapping</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>SI segment:</strong> Increase the total number of SI pairs to 9 (one for each data element); Add the data element name “Solicited/Unsolicited Indicator” to data element name list in SI03.</td>
</tr>
<tr>
<td><strong>SLN segment:</strong> SLN02 - Replace “Confirmation Requester’s Tracking Identifier” with “Confirmation Tracking Identifier”; mark as “Must Use”; remove note beginning with “For GISB, this element...”</td>
</tr>
</tbody>
</table>

## Transaction Set Tables

| “SI 1000/234 Pairs (Sub-detail)” table - add a row for Solicited/Unsolicited Indicator as the second row in the table: Element Name = Solicited/Unsolicited Indicator; Usage = M; Elem 1000 = SU; Elem 234 = S, U; Description = Solicited, Unsolicited |

| G850RQCF - Request for Confirmation (1.4.3) |
| **Data Element Xref to X12** |
| SLN segment: Replace ”Confirmation Requester’s Tracking Identifier” with ”Confirmation Tracking Identifier” |

| X12 Mapping |
| SLN segment: SLN02 - Replace ”Confirmation Requester’s Tracking Identifier” with ”Confirmation Tracking Identifier” |

## G865SQOP - Scheduled Quantity for Operator (1.4.6)

| Data Element Xref to X12 |
| Replace ”Confirmation Requester’s Tracking Identifier” with ”Confirmation Tracking Identifier” in headings for each section and in SLN segment (total of 7 occurrences) |

| X12 Mapping |
| SLN segment: SLN02 - Replace ”Confirmation Requester’s Tracking Identifier” with ”Confirmation Tracking Identifier”; change note to “For GISB, this element is conditional.” |

| N1 segment - Sub-detail - replace “Confirmation Requester’s Tracking Identifier” with “Confirmation Tracking Identifier” in segment notes. |

## 4. SUPPORTING DOCUMENTATION

### a. Description of Request:

Add two new data elements to the Confirmation Response document -- confirmation provider’s tracking ID, Unsolicited Confirmation Response Indicator, and one data element to the Operator Scheduled Quantity Document -- confirmation provider’s tracking ID.

### b. Description of Recommendation:

**Business Practices Subcommittee**

The BPS recommends that IR and Technical implement a mechanism for identifying that a confirmation response is an unsolicited confirmation response and provide support for the identification of line items so that the Operator Scheduled Quantity can tie back to an unsolicited Confirmation Response. This usage would be used in the documents Operator Scheduled Quantity and Confirmation Response when no confirmation request was being responded to but a confirmation response had been sent. There is a need to also support the inclusion in one EDI document, line items which individually respond to either a Request For Confirmation or are identified as an unsolicited Confirmation Response line items. As further
instructions, when sending an Operator Scheduling Quantity, the value of the identifier should be that associated with last information processed.

**Sense of the Room:**  September 18, 1997

<td>M(1)</td>
</tr>
<tr>
<td>SQOP</td>
<td>N/A</td>
<td>C, mandatory if present in the confirmation process.</td>
</tr>
</tbody>
</table>

M(1) Add to condition column in the Confirmation Response.

If the confirmation is solicited this contains the Confirmation Tracking Identifier from the relevant Request for Confirmation. If this is an unsolicited Confirmation Response, then this Confirmation Tracking Identifier is created by the originator of the unsolicited confirmation response.

A data element for an indicator plus replace Confirmation Requester's Tracking ID with a "generic" tracking ID which can be used for either party's tracking ID.

**Confirmation Response Document, 1.4.4**

Solicited/Unsolicited Indicator

Usage: Mandatory

Definition: Indicates whether the confirmation response line item is solicited or unsolicited.

Level: This would be at the line item (sub-detail) level.

Two code values:

**Solicited:** The confirmation response line item is in response to a request for confirmation line item.

**Unsolicited:** The confirmation response line item is not in response to a request for confirmation line item.

Replace existing Confirmation Requester's Tracking ID with a new "generic" Confirmation Tracking ID.

**Request for Confirmation, Confirmation Response Document, Scheduled Quantity for Operators Document**

Data element name: Confirmation Tracking Identifier

Definition: Used to identify a line item in the confirmation process. This field contains alpha-numeric data.

**Add to Technical Implementation of Business Process Description for the Request for Confirmation and Confirmation Response:**
The confirmation tracking identifier is used to identify a line item in the confirmation process. It is created by either the originator of the Request for Confirmation or the originator of an unsolicited Confirmation Response. It is not validated by the receiver of the document nor is it a key in the receiver of document's data base.

Make relevant changes to change data element names and update with above language.

Not necessary to add descriptions to the Scheduled Quantity for Operators Technical Implementation of Business Process as current Confirmation Requester's Tracking Number is not currently contained in this description for the SQOP.

**Sense of the Room:** November 14, 1997  
**Segment Check** (if applicable): 
In Favor: ___End-Users ___LDCs ___Pipelines ___Producers ___Services 
Opposed: ___End-Users ___LDCs ___Pipelines ___Producers ___Services

**Technical Subcommittee**

**Sense of the Room:** December 8, 1997  
**Segment Check** (if applicable): 
In Favor: ___End-Users ___LDCs ___Pipelines ___Producers ___Services 
Opposed: ___End-Users ___LDCs ___Pipelines ___Producers ___Services

c. **Business Purpose:**

The revisions will help facilitate the tracking of data when an unsolicited Confirmation Response document is utilized.

d. **Commentary/Rationale of Subcommittee(s)/Task Force(s):**

IR: The “generic” tracking identifier allows for the utilization of a single data element in three data sets, thus eliminating the need for an additional data element(s).
