**4. SUPPORTING DOCUMENTATION**

**a. Description of Request:**

Revise the usage of the Capacity Type Indicator, contained in Standard 1.4.1 (Nominations) from Mutually Agreeable (MA) to Business Conditional (BC).

**b. Description of Recommendation:**

**Business Practices Subcommittee**

The motion was made to:

Change Standard 1.3.27 from "Capacity Type Indicator (where mutually agreed)" to "Capacity Type Indicator (when applicable)" and,

Provide the instruction to the Information Requirements Subcommittee (IR) as follows:

Change the usage code of the Capacity Type Indicator contained in Standard 1.4.1 from Mutually Agreeable (MA) to Business Conditional (BC). Change the usage code of the Capacity Type Indicator contained in Standard 1.4.5 from Mutually Agreeable (MA) to Conditional (C) with the condition of "mandatory when present and processed in the nomination".

Opposed:         End-Users       LDCs        Pipelines       Producers       Services

A motion was made that:

The BPS requests that the IR review the data dictionaries for all transactions and examine the conditionality of conditional data elements which relate back to a business conditional data element. The examination of the conditional data elements would be for the conforming language of "mandatory when present and processed".

**Information Requirements Subcommittee**

Split request into 'A', which is Capacity Type Indicator and 'B', which is revision to condition of [business] conditional data elements ("present and processed"). [R

IR chairs will identify global revisions to the Condition of all conditional data elements that are based on 'BC' data elements. 'B' will be addressed at a subsequent IR meeting.

**Motion:** Adopt the above changes for the Nomination related data sets. In addition, as a note to BPS, the following will be sent back: IR believes that a similar process should be undertaken for Mutually Agreeable data elements. That is, IR proposes to review the data dictionaries for all transactions and examine the conditionality of conditional data elements which relate back to a mutually agreeable data element. The examination of the conditional data elements would be for the conforming language of "mandatory when present and mutually agreed to."

**Information Requirements Subcommittee:** August 18, 1997

**R97108B:**

Technical has questions on information passed to them by IR. The question is regarding the Condition of the Confirmation Service Identifier Code in the Request for Confirmation, Confirmation Response and Scheduled Quantity for Operator. The proposed Condition for all three documents states: "Required if Confirmation Service Contract field is present and processed."

The Conf data element is conditional on a BC data element that is in the same document, as opposed to a data element in a different document.

	<b>Conf Service Contract</b>	<b>Conf Service ID Code</b>
RFC	BC – Mandatory when confirmation is under a contract.	C - Mandatory when Confirmation Service Contract is sent
CR	BC – Mandatory when confirmation is under a contract.	C - Mandatory when Confirmation Service Contract is sent
unsolicited CR	BC – Mandatory when confirmation is under a contract.	C - Mandatory when Confirmation Service Contract is sent
SQOP	C – Mandatory when present in the confirmation process.	C - Mandatory when Confirmation Service Contract is sent

**RECOMMENDATION TO GISB EXECUTIVE COMMITTEE**

**Requester: Texas Gas Transmission**

**Request No.: R97108(B)**

Is there a concern for the unsolicited Confirmation Response – question is where is it "present"? Is not a problem. The Condition of the Confirmation Service Identifier Code applies to the Confirmation Service Contract that is contained in the same document.

**MOTION:**

Strike the phrase "and processed" from the Condition for the Confirmation Service Identifier Code data element in the Request for Confirmation, Confirmation Response and Scheduled Quantity for Operator.

This request was considered by Technical at the 8/17/98 meeting, but there were questions about the new condition of Confirmation Service Identifier Code. These questions were passed back to IR. IR answered the questions and revised the condition and the technical implementation for the Confirmation Service Identifier Code was developed.
