b. Description of Recommendation:

**EBB-Internet Implementation Task Force** (November 20, 1998)

IR17 Instruct Information Requirements Subcommittee to address a mutually agreeable business practice of confirmations for a date range and communicating the status of the unconfirmed portion of the date range of the nomination to the Service Requester or operator.

Vote: Passes unanimously.
Information Requirements Subcommittee

IR Implementation (day one):
This request is on hold until the second day of the meeting when the requester will be present.

IR Implementation (day two):
An example was given: A quantity may be nominated for one month, and the scheduled quantity that is sent in return is for one day. Also, some TSPs confirm for a month even though they send scheduled quantity for only one day at a time. Therefore, a mechanism is needed in the Scheduled Quantity data set to indicate that the status of the quantities. In the example, the quantity for one day is scheduled and the remainder of the quantities are confirmed. Based on the example, the status data element needs to be at the line item level.

MOTION:
♦ Add the following data elements to the line item level of the Scheduled Quantity:

<table>
<thead>
