4. SUPPORTING DOCUMENTATION

a. Description of Request:

There was no formal GISB request. This work was done pursuant to a request from the EII Task Force.

b. Description of Recommendation:

EBB-Internet Implementation Task Force (September 3, 1998)
Action: 4.3.O When standardized, all elements used in standard EBB/EDM, EDI/EDM and FF/EDM should be defined in the related GISB x.4.z standard.

Business Name/ Abbreviation Definition   Area   EBB   EDI   FF

	(H/D)	Usage	Usage	Usage	Condition
Examples:					
Upstream Identifier Code	Detail	n/u	C	C	as stated
Upstream Identifier Name	Detail	C	n/u	n/u	as stated
US Party					
xxx Code		n/u	M	N	
xxx Code Description		M	n/u	n/u	

Note: For instance, for the Nomination (1.4.1) the Upstream Identifier Code could be required for the EDI usage and the Flat File usage, but may not be used for the Web Page usage. Correspondingly, the Upstream Identifier Name could be required for the Web Page usage and may not be used for EDI or Flat File. [Not to be included as part of the standard language.]

Note: The table and note are not part of the standard; they are presented for illustrative purposes only.

Vote: This item was adopted unanimously as a principle (4.1.x).

EBB-Internet Implementation Task Force (April 26, 1999)

Action: The minutes from April 6 will be reviewed for other outstanding capacity release issues, otherwise, it is considered closed as a topic for the EII task force, excepting any data set changes resulting from Information Requirements Subcommittee.

Information Requirements Subcommittee

Approve the revised Capacity Release Data Dictionaries, approve the workpaper entitled Data Element Cross Reference – Capacity Release, and send the issue, as modified, regarding the data element Bidder Affiliate Indicator to the Business Practices Subcommittee.

RECOMMENDATION TO GISB EXECUTIVE COMMITTEE

Requester: EBB-Internet Implementation Task Force   **Request No.:**

Information Requirements Subcommittee
IR adopted the Capacity Release data dictionaries, and the code values table approved by the BPS at its April 6th meeting.

Sense of the Room: April 11-12, 2000 _8_ In Favor   _0_ Opposed

Technical Subcommittee
Technical reviewed the data dictionaries presented by IR and sent back the following issues:
Issue #1:
Gas Transaction Point 1 Code needs to be split out into separate Common Code and Proprietary code data elements for all the datasets where it exists [5.4.1, 5.4.2, 5.4.3, 5.4.4, 5.4.7, 5.4.9, 5.4.13, 5.4.17, 5.4.18].
Issue #2:
In the Offer Upload Quick Response (5.4.8) and Bid Upload Quick Response (5.4.19), the Technical Subcommittee recommends that the Gas Transaction Point 1 Code and Gas Transaction Point 2 Code data elements be split out into separate Common Code and Proprietary code data elements. Even though these datasets are not used for EBB, there are two distinct data elements that can be sent to identify the location via EDI in response to an Offer Upload or Bid Upload. Since these data elements were split out in the Offer Upload and Bid Upload, and given distinct usages for EDI, these corresponding changes are needed for consistency. In addition, the data dictionary needs to have the ** footnote added.

Sense of the Room: May 18, 2000   _3_ In Favor   _0_ Opposed

Information Requirements Subcommittee
IR reviewed the issues sent back by Technical and made changes to the Capacity Release data dictionaries. These changes were reviewed at an IR conference call on July 5, 2000. Further changes to the data dictionaries were identified. The group determined that voting was not in order until all identified issues had been addressed. Accordingly, no vote was taken.

Sense of the Room: July 5, 2000   ___ In Favor   ___ Opposed

Information Requirements Subcommittee
IR again reviewed the Capacity Release data dictionaries with further changes incorporated. The group voted to send the Capacity Release data dictionaries, along with the code values table approved by the BPS at its April 6th meeting, to Technical.   Please find the data dictionaries and code values table attached.

Sense of the Room: July 27, 2000   _8_ In Favor   _0_ Opposed

Technical Subcommittee
Technical incorporated the changes required as a result of the work done by IR at their meetings on July 5th and July 27th.

Sense of the Room: August 3, 2000   _3_ In Favor   _0_ Opposed

Executive Committee (October 12, 2000)
IR asked to postpone EC consideration of the request to review comments that had been submitted during the comment period. No vote was taken. The comments presented to the EC are as follows:

RECOMMENDATION TO GISB EXECUTIVE COMMITTEE

Requester: EBB-Internet Implementation Task Force   **Request No.:**

The Information Requirements Subcommittee (IR) has modified the capacity release data dictionaries to accommodate EBB and Flat file implementations. Enron Transportation Services (ETS) suggests the following revisions to the IR work product. Please note that the red-lining below is based on the IR work product, not the Version 1.4 data dictionaries. For clarity, where the modification affects a 'data line' or an 'indented data element', the data line and the associated indented data elements are shown.

❑ In the data sets listed below, the current usage of the Gas Transaction Point 1 Code is 'Mandatory'. The suggested revisions clarify two things: (1) the data is still required (mandatory) and (2) if used, a proprietary segment identifier is placed in the Gas Transaction Point 1 *Proprietary* Code field, not in the Gas Transaction Point 1 Code field. Also, the footnote '*', which designates a common code, should be added to the Gas Transaction Point 1 Code.

Gas Transaction Point 1 Proprietary Code (GTP 1 Prop)		C	C	Mandatory when Gas Transaction Point 1 Code is not present. *<u>When this field uniquely identifies the segment, a proprietary segment identifier may be used</u>.*

❑ In the data set listed below, a second sentence should be added to the 'Condition' for the Gas Transaction Point 1 Proprietary Code. This notes that if used, a proprietary segment identifier is

placed in the Gas Transaction Point 1 *Proprietary* Code field, not in the Gas Transaction Point 1 Code field.   Also, the footnote '*', which designates a common code, should be added to the Gas Transaction Point 1 Code.

❑ In the data sets listed below, the usage of the Gas Transaction Point 1 *Code* is 'Mandatory'. Therefore, the 'EBB Usage' of the Gas Transaction Point 1 *Description* should also be 'Mandatory'. Technical Subcommittee (November 29, 2000)

Technical raised questions about the condition of the Gas Transaction Point 1 Code in the Note/Special Instruction dataset 5.4.17. The condition indicates that a proprietary code can be used in the Gas Transaction Point 1 Code data element. Technical recommends that this condition be reviewed and clarified by IR.
