3. Description of Proposed Standard or Enhancement

In the Measured Volume Audit Statement, make the values allowed for Static Pressure Range consistent with Static Pressure, and make the values allowed for Maximum Differential Pressure consistent with Differential Pressure.

4. Use of Proposed Standard or Enhancement

Consistency is needed to ensure proper implementation of the Measured Volume Audit Statement. The valid values for measurement basis for the Static Pressure Range are Kilopascal, PSIA and PSI. The valid values for measurement basis for the Static Pressure are Kilopascal, PSIA and PSIG. The valid values for measurement basis for the Maximum Differential Pressure are Kilopascal, PSIA and Inches of water. The valid values for measurement basis for the Differential Pressure are Kilopascal and PSIA.

5. Description of any Tangible or Intangible Benefits to the Use of Proposed Standard or Enhancement

The enhancement will ensure that corresponding pressures are reported using the same measurement basis, and it will eliminate any values that are not logical.

6. Estimate of Incremental Specific Costs to Implement Proposed Standard or Enhancement

none

7. Description of any Specific Legal or Other Considerations:

8. If this Proposed Standard or Enhancement is not tested yet, list the Trading Partners willing to test Standard or Enhancement?
