

MOTION TO RECOMMEND MODIFYING THE IIPTF'S MANDATE  
INADVERTENT INTERCHANGE PAYBACK TASKFORCE  
BUSINESS PRACTICES SUBCOMMITTEE, NORTH AMERICAN ENERGY STANDARDS BOARD

MOTION TO RECOMMEND MODIFYING THE IIPTF's MANDATE:

"Whereas the NERC JIITF white paper defines a Frequency Contribution Component of Inadvertent Interchange, the IIPTF recommends that the JIC remand back to NERC as a reliability issue the development, if any, of any such standard measuring the impact of Inadvertent Interchange on frequency, with monetary assessment, if any, for frequency impact to be regarded as NERC compliance-related."

PURPOSE:

The JIC handed "the entire" JIITF white paper to the IIPTF to develop a standard for. Rather than simply dismiss or ignore the FCC part (which might be imprudent since it might be a reliability issue), the IIPTF prudently acknowledges/clarifies by this motion that, if Inadvertent has any impact on frequency (reliability), that is a matter not to be handed to the IIPTF/NAESB to decide whether to develop a standard for, but to be sent back to NERC for NERC to decide whether to develop a standard for it or not. Otherwise, since the JIC delegated that task (contained in the JIITF white paper) to NAESB, NERC is not free to address it unless the JIC clarifies its mandate to NAESB.
