The Honorable Kimberly D. Bose  
Secretary  
Federal Energy Regulatory Commission  
888 First Street N.E., Room 1A  
Washington, D.C. 20585

RE: Standards for Business Practices of Public Utilities (Docket No. RM 05-5 et al)

Dear Ms. Bose:

The North American Energy Standards Board ("NAESB") herewith submits this report to the Federal Energy Regulatory Commission ("FERC" or "Commission") regarding NAESB's activities from October 2007 to August 2008 with respect to the adoption of Version 002 of the NAESB Wholesale Electric Quadrant ("WEQ") standards. The NAESB WEQ Version 002 standards have been approved by the WEQ Executive Committee and will be published on September 30, 2008 and are provided herein. A supplemental report will be submitted to complete the ratification section on September 30, 2008. An executive summary of the changes which resulted in Version 002 is included in the attached report, along with a list of the standards that were created or modified as part of Version 002. Two minor corrections are applied to Version 002 and are also included in this filing. The remainder of the NAESB business practices under development or planned in response to FERC Order No. 890 will be filed separately, in subsequent versions once complete. Reference to these standards development activities is included in the Version Summary.

The standards in this submittal include modifications of existing standards or new standards to support FERC Order No. 890, FERC Order No. 890-A and FERC Order No. 890-B, including the standards to support conditional firm service which have a deadline of August 29, 2008<sup>1</sup>. The NAESB business practices related to Available Transfer Capability ("ATC"), with the exception of the standards to support the North American Electric Reliability Corporation ("NERC") Capacity Benefit Margin ("CBM") standards and the ATC Information List standard, have a November 27, 2008<sup>2</sup> deadline and are included in this filing. The NAESB business practices related to the CBM standards will be submitted to the Commission on or before February 19, 2009, as requested in a recent issuance from FERC<sup>3</sup>. In addition, several of the FERC Order No. 890 non-deadline related standards, a maintenance item related to the Manual Time Error Corrections standards (WEQ-006), and an interpretation of the Gas/Electric Coordination standards (WEQ-011) are included in this submission.

The development efforts in NAESB reflect the work of multiple market interests. In addition, the NAESB WEQ has worked in close coordination with the North American Electric Reliability Corporation ("NERC") on business practice standards that are complementary to NERC reliability standards so that the standards for both organizations

Page 2

remain in lock-step for consistency in the wholesale electric industry. The intra-organization collaborations are not only permitted in the NAESB process, but strongly encouraged – to provide an environment in which standards development has a more diverse vetting in the industry and a resulting broader application.

Some of the standards development activity undertaken that produced Version 002 had considerable industry debate before an agreement was reached on the level of standardization needed and the actual text of the standards themselves. The NAESB process supports a wide range of perspectives, and through a public process permitting all segments of the marketplace to voice equally their issues, balanced voting allows a disparate group to move towards consensus.

All requests for new standards or modifications of existing standards and requests for interpretation are posted on the NAESB home page. All work papers and recommendations from subcommittees and task forces regarding the requests are also posted on the NAESB home page ([www.naesb.org](http://www.naesb.org)). Participation in the task forces and subcommittees, where requests are addressed and recommended standards are formulated, is open to any interested party regardless of membership. Should a participant be unable to attend a meeting where a request of interest is discussed, the party may prepare written comments, which will be posted as work papers for the subcommittee or task force.

The Executive Committee meetings where these standards were discussed and adopted took place from November 2007 to August 2008. The minutes of these meetings are provided as links, which include the voting records of the Executive Committee. The ratification ballots and member ratification voting record results are also included as links. All comments that were filed on the standards as part of the NAESB formal comment period are also included as links.

The cover letter, report and enclosures are being filed electronically as a single document in Adobe Acrobat® Print Document Format (.pdf), and each enclosure is bookmarked separately. The cover letter, report and enclosures are also provided in Microsoft Word 2003 format. The filing is also available on the NAESB web site ([www.naesb.org](http://www.naesb.org)). Please feel free to call me at (713) 356-0060 or refer to the NAESB website ([www.naesb.org](http://www.naesb.org)) should you have any questions or need additional information regarding the NAESB WEQ Version 002 standards.

Respectfully submitted,

*Rae McQuade*

Ms. Rae McQuade  
President & COO, North American Energy Standards Board

**REPORT OF THE NORTH AMERICAN ENERGY STANDARDS BOARD**

The North American Energy Standards Board ("NAESB") is voluntarily submitting this report in accordance with the Commission's Order Nos. 890, No. 890-A and 890-B<sup>4</sup> in the above referenced docket, as well as Order 676<sup>5</sup>. The report includes a summary of the changes that resulted in Version 002 of the wholesale electric quadrant standards, along with a list of the standards that were created or modified as part of Version 002 -- cross-referenced both by request number and by version. The standards can be downloaded from the NAESB home page ([www.naesb.org](http://www.naesb.org)).

In January 2002, the Gas Industry Standards Board ("GISB") became the Wholesale Gas Quadrant (WGQ) of NAESB and three other quadrants were formed, the Wholesale Electric Quadrant (WEQ), the Retail Gas Quadrant, and Retail Electric Quadrant. NAESB WEQ Version 0 standards<sup>6</sup> were adopted by the WEQ and published on January 15, 2005. NAESB WEQ Version 1 standards<sup>7</sup> were adopted by the WEQ and published on October 31, 2007 and subsequently filed with the Commission on December 21, 2007.

There are seven enclosures supporting the report. Provided in appendix A is a list of the links to the minutes from the Executive Committee ("EC") meetings during which recommendations were considered that resulted in Version 002 of the NAESB WEQ standards. The EC minutes include discussion of recommendations from task forces and subcommittees, which ultimately resulted in the standards for Version 002. The EC voting records are attached as part of the minutes. Also included in appendix A is the list of links to all comments filed on the standards that were recommended for adoption to the EC. Provided in appendix B is the list of links to the NAESB membership ratification ballots, which include the EC adopted recommendations that are the basis for the Version 002 changes. Also provided in this appendix is the list of links to the ratification results. Provided in appendix C is the list of available transcripts. appendix D provides a cross reference of FERC actions on NAESB final actions that are now contained in Version 002. More information on any of these actions can be found on the NAESB home page, including all of the minutes and work papers for the subcommittees and task forces, all work papers submitted and all comments provided to subcommittees and task forces in informal comment periods. Provided in appendix E is an overview of the NAESB process by which the standards were adopted. Provided in appendix F is the Order No. 890 work plan and status. Lastly, appendix G contains the 2008 WEQ Annual Plan.

This report is intended solely as a status report from NAESB regarding Version 002 of its standards. NAESB does not advocate that the Commission take a particular position on any of the issues presented.

## VERSION 002 SUMMARY

Presented here is a summary of the activities that led to the compilation of the NAESB Wholesale Electric Quadrant (WEQ) Standards Version 002. All references in this summary pertain only to the WEQ. Supporting documents can be found in appendices A, B, C, D, E, F and G as enclosures to this report. All Version 002 standards that were added or modified are contained in a table following this summary. The table cross references the standards to the related requests for development and the actions that were taken.

In response to FERC Order No. 890, NAESB leadership requested that the NAESB Electronic Scheduling Subcommittee/Information Technology (“ESS/ITS”) and Business Practice Subcommittees (“BPS”) coordinate efforts to address the ATC related issues from FERC Order No. 890. Since that time, the two subcommittees have met over 60 times to draft and modify the requested standards. The ESS/ITS and BPS worked in close coordination with the North American Electric Reliability Corporation (“NERC”) on business practice standards that are complementary to NERC reliability standards so that the standards for both organizations are consistent. This work includes not only joint meetings of NERC drafting teams with NAESB subcommittees, but also joint NERC/NAESB subcommittees. Since April 5, 2006 the NERC ATC drafting team and the ESS/ITS and BPS have met 25 times to ensure the reliability standards and business practice standards remained coordinated and consistent through the development process. The NERC/NAESB Joint Interchange Scheduling Working Group (“JISWG”) is a standing joint subcommittee made of both NERC and NAESB participants that worked on modifications to the coordinate interchange business practice standards and reliability standards in addition to work on the NERC Registry and other NERC reliability standards. The JISWG has met 53 times since it was organized in 2005 (7 times in 2005, 13 times in 2006, 28 times in 2007, and 5 times in 2008 to date). NERC staff also participates on the NAESB WEQ Executive Committee as a member of the Executive Committee with voting rights and privileges. This participation ensures that the work of both organizations remains closely coordinated. These intra-organization collaborations are not only permitted in the NAESB process, but also encouraged – to provide an environment in which standards development has a broader vetting in the industry and a resulting broader application. In addition to the joint work with the BPS, the ESS/ITS was assigned the task of addressing the FERC Order No. 890 issues not related to ATC, and to that end, have met 30 times.

Both NERC and NAESB are aware that the standards to complement the NERC reliability standards pertaining to ATC are being filed out of the sequence originally intended by the organizations. After much discussion with NERC, it was determined that this course of action was in the best interest of the wholesale electric industry. The ESS/ITS and BPS determined that certain items contained in the FERC Order No. 890 work plan<sup>8</sup> did not require coordination with the NERC ATC drafting team. Specifically, these items are the standards to support the posting of the available transfer capability and total transfer capability (“ATC/TTC”) narratives and load forecast and actual load. The subcommittees took action to complete these items. All other ATC related items in the FERC Order No. 890 work plan were designated as items which required NERC/NAESB coordination. Although several of the ATC related standards include references to NERC reliability standards that have not yet been finalized through the NERC process, they are based on their current work product. The standards include placeholders for the NERC references, which will be updated to reflect the final work product once they are approved by NERC. Neither NERC nor NAESB expect that these NAESB standards will require significant rework once NERC adopts its related reliability standards. NAESB leadership will review the final NERC standards once adopted and will identify if any changes are needed to the standards that were included in Version 002. If changes are needed, a determination will be made whether the changes can be processed as minor actions, or for more substantive changes, the standards modification process will be used. If any modifications are necessary as a result of the finalized NERC standards, NAESB will submit a supplemental filing.

In response to the Commission’s request, the NAESB WEQ leadership developed the FERC Order No. 890 work plan, which includes citations to the FERC Order Nos. 890, 890-A and 890-B and corresponds with the 2008 WEQ Annual Plan<sup>9</sup>. Included in the work plan are the scheduled completion dates of the two time sensitive ATC related items that have not yet been completed, the ATC information list standard, due November 27, 2008 and the capacity benefit margin (“CBM”) standards, due February 19, 2009. These items will be included in subsequent

<sup>8</sup> NAESB Order 890 work plan, available at [http://naesb.org/pdf3/order890\\_081908\\_naesb\\_workplan\\_clean.doc](http://naesb.org/pdf3/order890_081908_naesb_workplan_clean.doc) (August 26, 2008).

<sup>9</sup> NAESB 2008 WEQ Annual Plan, available at [http://www.naesb.org/pdf3/weq\\_2008\\_annual\\_plan.doc](http://www.naesb.org/pdf3/weq_2008_annual_plan.doc) (August 26, 2008).

Version 002 filings within the set deadlines. Other standards to be included in a subsequent filing that do not have a FERC Order No. 890 deadline, but are FERC Order no. 890 related include: network service on OASIS; pre-emption; procedures to implement displacement/interruption terms of the pro forma tariff; rollover rights for redirected transmission service; coordination of transmission requests across multiple transmission systems; rebid of partial service to allow a transmission customer to rebid a counteroffer of partial service; posting of curtailment information on OASIS; redispatch cost posting to allow third party offers of planning redispatch services and submittal windows. Also outstanding that may contribute new or modified standards is a review of WEQ standards as they relate to paragraph 1390 of FERC Order No. 890 to determine if modifications are required.

Some of the standards development activity undertaken that produced Version 002 had considerable industry debate before an agreement was reached on the level of standardization needed and the actual text of the standards themselves. The NAESB process supports a wide range of perspectives, and through a public process permitting all segments of the marketplace to voice equally their issues, balanced voting allows a disparate group to move towards consensus. Through this process, NAESB was able to produce new standards and modify existing standards for conditional firm service to meet the August 29, 2008 deadline<sup>10</sup>. NAESB worked independently of NERC to develop the following three ATC related standards due on November 27, 2008: the ATC/TTC narratives standard; the load forecast and actual load standard<sup>11</sup>; and modifications to the current business practice standards (WEQ-001) to allow for transparency reporting and related functions. NAESB worked jointly with NERC to develop the ATC information link standards; the postbacks and counterflows standards and the existing transmission commitment (ETC) standards which are also due on November 27, 2008,<sup>12</sup> but are provided early in the this submittal. Non-deadline FERC Order 890 related standards developed by NAESB include: the Group 1 modifications to the OASIS standards and communication protocol (“S&CP”), the data dictionary and implementation guide to include annotations for ATC, load forecast and actual load, rebid of partial service, preconfirmation priority and conditional firm service; the Group 2 standards for metrics, redispatch cost posting and WEQ-001 changes for rebid of partial service and preconfirmation priority; and the modifications to the OASIS exemptions in appendix C of WEQ-001. Lastly, as non-FERC Order No. 890 related items, NAESB incorporated demand resources into certain ancillary services definitions as requested by the Commission Wellinghoff’s concurring opinion<sup>13</sup> in FERC Order No. 890-A and as a maintenance item, NAESB revised the interconnection time monitor standards to allow for some slight variances for the interconnection time monitor.

The summary organized into six sections: completed FERC Order No. 890 ATC related standards with the August 29 deadline, completed FERC Order No. 890 ATC related standards with the November 2008 deadline, completed FERC Order No. 890 related OASIS standards without deadlines, completed standards not related to FERC Order No. 890, standards under development or planned related to FERC Order No. 890 that will be the subject of either versions 002.1 or 002.2, and FERC Order No. 890 items originally identified for NAESB standards development for which NAESB has decided needed no standards development as they were addressed in other NAESB or NERC efforts. Descriptions of each grouping are shown below:

#### **FERC Order No. 890 ATC Related Standards with the August 29 Deadline**

On August 8, 2008, the NAESB Executive Committee (“EC”) adopted the business practice standards to support conditional firm service<sup>14</sup>. In paragraph 1078 of FERC Order No. 890<sup>15</sup>, the Commission requested that transmission providers “assign short-term firm service to conditional firm customers as the service becomes available” and work with NAESB to “develop the appropriate communication protocols to implement this attribute of conditional firm service.” The Commission also requested in paragraph 592 of FERC Order No. 890-A that transmission providers work through NAESB to “develop tracking capabilities and business practices for tagging for implementation of conditional firm service.” These requests were addressed through two separate actions. First, the ESS/ITS made modifications to the OASIS S&CP (WEQ-002), the data dictionary (WEQ-003) and implementation guide (WEQ-013) to allow for the capabilities requested in paragraph 1078 of FERC Order No. 890. This work was

<sup>10</sup> FERC Notice of Extension of Time to NAESB, *supra* note 1.

<sup>11</sup> FERC Notice of Extension of Time to NERC, *supra* note 2.

<sup>12</sup> *Id.*

<sup>13</sup> FERC Commissioner Jon Wellinghoff, concurring opinion in response to Federal Power Act, 16 U.S.C. §791 (a) (2008), *available at* . [http://www.naesb.org/pdf3/weq\\_atc\\_afc070808w24.pdf](http://www.naesb.org/pdf3/weq_atc_afc070808w24.pdf) (issued April 21, 2008).

<sup>14</sup> NAESB 2008 WEQ Annual Plan Items 2(a)(i)(2), 2(a)(vii)(1), *available at* [http://www.naesb.org/pdf3/weq\\_2008\\_annual\\_plan.doc](http://www.naesb.org/pdf3/weq_2008_annual_plan.doc) (August 26, 2008).

<sup>15</sup> FERC Order No. 890, *supra* note 4, ¶1078.

completed as part of the Group 1 assignments contained in the FERC Order 890 work plan. The ESS/ITS met 10 times to address the assignment. The recommendation developed by the subcommittee passed a subcommittee vote on September 25, 2007 and was sent out for a thirty-day industry comment period on October 3, 2007. The WEQ EC adopted the recommendation via notational ballot on January 16, 2008 and the recommendation was ratified February 29, 2008 with minor corrections applied to the OASIS S&CP, data dictionary and implementation guide on February 27, 2008.

Subsequently, to address the tracking capabilities and business practices for tagging of conditional firm, the ESS/ITS completed Group 7 of the FERC Order 890 work plan<sup>16</sup>. In the process of addressing Group 7, modifications were made to the work previously completed in Group 1. The ESS/ITS met eight times and voted the standard out of subcommittee on June 24, 2008. The conditional firm standard created and modified standards in WEQ-001, WEQ-001 Appendix C, WEQ-002, WEQ-003, WEQ-008 and WEQ-013. Ratification by the membership is expected on September 25, 2008. This item is referenced separately from conditional firm service related items in Group 1 as they do not address the business practices for conditional firm service but address the technical aspects (OASIS S&CP, data dictionary, and implementation guides) of implementing the business practices.

### **FERC Order No. 890 ATC related standards with the November 2008 deadline**

There are seven efforts due in November of 2008 related to FERC Order No. 890 that are provided in this report. They are described below.

First, business practices standards were drafted and modified to support the transparency reporting and related functions that are required by FERC Order No. 890<sup>17</sup>. These standards were added as modifications to WEQ-001. This annual plan item was completed without the coordination of NERC. The item was discussed at two separate ESS/ITS and BPS two day meetings and posted for an informal comment period. It was voted out of the subcommittee on August 17, 2007. The Executive Committee reviewed the recommendation and approved it on November 6, 2007. The modifications to WEQ-001 were ratified December 19, 2007 with minor corrections applied February 27, 2008.

Second, the business practice standards for the posting of ATC/TTC narratives were drafted to set forth how transmission providers will post “explanations of the reason for a change in monthly and yearly ATC values on a constrained path.” The standards include a requirement that the transmission provider post the reason for the change in a narrative form. This item was referenced in paragraph 369 of FERC Order No. 890<sup>18</sup> and did not require coordination with the NERC reliability standards development. These standards affect WEQ-001, WEQ-002, WEQ-003 and WEQ-013, as well as Appendix A and B of WEQ-013. The ESS/ITS and BPS met 17 times to address the item and the standards were voted out on February 13, 2008. The EC approved the standards by notational ballot on April 14, 2008. The business practices standards were ratified May 16, 2008.

Third, the business practice standards that were drafted to set forth posting requirements on OASIS for the “underlying load forecast assumption for all ATC calculations” and “actual daily peak load for the prior day” did not require coordination with NERC. This standard was completed as annual plan item 2(b)(v)(4). The standards affect WEQ-001, WEQ-003 and WEQ-013 and were voted out of subcommittee on March 10, 2008, after the ESS/ITS and BPS met 6 times to address the item. The EC approved the standards via notational ballot on April 23, 2008 and the business practice standards were ratified July 23, 2008.

Next, the business practice standards that were drafted to set forth the procedure for input of TTC and ATC methodologies and values<sup>19</sup> were completed with the close coordination of the NERC ATC drafting team. During the NERC and NAESB joint standards development effort, it was determined that the standards contained in NERC MOD003 should be business practice standards instead of reliability standards. The result of the NERC MOD003 transition to a business practice is the ATC information link on OASIS, as it was developed by the ESS/ITS and BPS. These standards are intended to be included in WEQ-001. The ESS/ITS and BPS met 12 times to address this item, including 4 meetings with the NERC ATC drafting team. The standards were voted out of the subcommittee

---

<sup>16</sup> FERC Order No. 890, 18 C.F.R. § 35, §37, ¶592 (2007).

<sup>17</sup> NAESB 2008 WEQ Annual Plan Item 2(c), *supra* note 10.

<sup>18</sup> FERC Order No. 890, *supra* note 4, ¶369.

<sup>19</sup> NAESB 2008 WEQ Annual Plan Item 2(b)(vii), *supra* at note 10.

on March 13, 2008, and the EC approved the standards via notational ballot on May 2, 2008. The business practice standards were ratified June 27, 2008.

Following, the business practice standards drafted to address postbacks and counterflows<sup>20</sup> were approved by the EC on August 19, 2008. These standards were developed in close coordination with NERC in response to paragraph 213 of FERC Order No. 890<sup>21</sup>. In communications with the NERC leadership, it was determined that a business practice standard addressing counterflows was unnecessary as they have been addressed in the reliability standards. Therefore, the ESS/ITS and BPS limited the scope of their standards development to postbacks. In development of the postback standard, the NAESB ESS/ITS and BPS met 6 times independently and several times with the NERC ATC drafting team to ensure that the standards issues were properly addressed. The postback standards were voted out of subcommittee on May 15, 2008 and are currently out for membership ratification. Ratification of these standards should complete on September 22.

Lastly, the business practice standards to complement NERC reliability standards for existing transmission commitment (ETC) and to create a “consistent approach for determining the amount of transfer capability a transmission provider may set aside for its native load and other committed uses”,<sup>22</sup> were developed. The standards created affected WEQ-001, WEQ-003 and WEQ-013 as well as the ATC information link standard. The NAESB ESS/ITS and BPS met on 4 occasions to complete the standards which were voted out of subcommittee on Jun 17, 2008. The NAESB EC approved the business practice standard on August 19, 2008. Ratification of these standards should complete on September 22.

#### **FERC Order No. 890 related OASIS standards without deadlines**

NAESB is submitting three FERC Order No. 890 related standards that do not have deadlines and are specified in the Order 890 work plan in groups 1 and 2. For group 1, standards supporting annotations for ATC; load forecast and actual peak load; rebid of partial service; preconfirmation priority and conditional firm are complete. For group 2, metrics redispatch cost posting and WEQ-001 changes for rebid of partial service and preconfirmation priority are complete. Thirdly, the standards supporting the OASIS exemptions in Appendix C of WEQ-001 are complete. The standards development efforts are described below.

NAESB modified the S&CP, data dictionary and implementation guide (WEQ-002, WEQ-003, WEQ-013) to include standards supportive of annotations for ATC; load forecast and actual load; re-bid of partial service; preconfirmation priority; and conditional firm service<sup>23</sup> as part of group 1 of the FERC Order No. 890 work plan. The standards were discussed at 10 meetings of the ESS/ITS subcommittee, after which the proposed recommended standards were approved by the subcommittee in a vote taken on September 25, 2007. The proposed standards were sent out for a thirty-day industry comment period on October 3, 2007. The WEQ EC adopted the recommendation via notational ballot on January 16, 2008 and the recommendation was ratified February 29, 2008 with minor corrections applied to the OASIS S&CP, data dictionary and implementation guide on February 27, 2008.

Next, the ESS/ITS drafted the OASIS Exemptions in Appendix C of WEQ-001 to provide a central location to identify those broad based exemptions provided to groups of WEQ members per FERC Orders and regulations<sup>24</sup>. The appendix is not intended to document individual organization tariff waivers or exemptions. In the event of conflicts between the NAESB OASIS business practices and an individual approved tariff, the standards indicate that the tariff shall prevail as documented in the introduction section of WEQ-013. The subcommittee met 5 times to draft the appendix, which passed a vote on December 17, 2007 and was sent out for a thirty-day industry comment period on December 19, 2007. The WEQ EC approved the recommendation on February 4, 2008 and it was ratified on March 3, 2008.

Finally, in paragraph 413 of FERC Order No. 890<sup>25</sup> the Commission requested NAESB to develop business practice standards to “post on OASIS metrics related to the provision of transmission service under the OATT” including the posting of “the number of affiliate versus non-affiliate requests for transmission service that have been

---

<sup>20</sup> *Id.* at 2(b)(ii)(2).

<sup>21</sup> FERC Order No. 890, *supra* note 4, ¶213.

<sup>22</sup> 2008 WEQ Annual Plan Items 2(a)(iv)(4), 2(a)(vi)(4), 2(b)(ii)(1) *supra* at note 10.

<sup>23</sup> 2008 WEQ Annual Plan Items 2(a)(i)(1-6), *supra* at note 10.

<sup>24</sup> *Id.* at 2(a)(i)(7).

<sup>25</sup> FERC Order No. 890, *supra* note 4, ¶413.

rejected” and “the number for affiliate versus non-affiliate requests for transmission service that have been made<sup>26</sup>.” The standards also set forth the length of the service request and the type of the service requested. In paragraph 1318 of FERC Order No. 890<sup>27</sup> the Commission requested NAESB to develop OASIS business practice standards to implement the standard performance (planning study) metrics. In Paragraph 1162 of FERC Order No. 890<sup>28</sup> the Commission requested NAESB to develop business practices for redispatch posting. The posting of redispatch information includes the posting of each transmission provider’s “monthly average cost of redispatch for each internal congested transmission facility or interface over which it provides redispatch service using planning redispatch or reliability dispatch under the pro forma OATT.” The business practice standards for redispatch cost posting also include functionality for transmission providers to post “a high and low redispatch for the month” each internal congested transmission facility or interface over which it provides dispatch service. In paragraph 1378 of FERC Order No. 890<sup>29</sup> the Commission requested NAESB to develop OASIS business practice standards to complement the OASIS S&CPs developed for rebid of partial service across a single Transmission Provider’s system. In paragraphs 1392 and 1401 of FERC Order No. 890<sup>30</sup> the Commission requested NAESB to develop OASIS business practice standards to complement the OASIS S&CPs developed to prohibit “transmission customers from changing a request into a pre-confirmed request and requiring OASIS platforms to be accessible on non-Window/Explorer computers. NAESB also developed OASIS business practice standards and OASIS S&CPs so that “pre-confirmed non-firm point-to-point transmission service requests and short-term firm point-to-point transmission service requests” have priority though “longer duration requests for transmission service will continue to have priority over shorter duration requests for transmission service.” Preconfirmation will serve as a tie-breaker when the requests are of equal duration. After 6 meetings, the recommendation passed the subcommittee on February 12, 2008 and went out for industry comment on February 20, 2008. The WEQ EC adopted the recommendation on May 13, 2008 and it was ratified on June 23, 2008.

#### **Standards not related to FERC Order No. 890**

There are four items included in this filing that are not related to FERC Order No. 890. The eTariff standards have previously been filed with the Commission and are mentioned here because NAESB is publishing them in Version 002, and Version 002 in total is the subject matter of this report. An interpretation for FERC Order No. 698, modifications to the interconnection time monitor standards and the incorporation of demand resources into certain ancillary services definitions are also included in this section.

First, NAESB developed business practices to support the eTariff program including submittal of tariffs and metadata<sup>31</sup>. The recommendation passed a subcommittee vote on January 25, 2008 and was sent out for a thirty-day industry comment period on January 29, 2008. The WEQ Executive Committee and the WGQ Executive Committee jointly approved the recommendation on March 4, 2008 via notational ballot and it was ratified on April 4, 2008<sup>32</sup>. It was filed with the FERC on [April 15, 2008](#). The FERC issued its Notice of Proposed Rulemaking on [April 17, 2008](#). These standards (WEQ-014) have a limited copyright waiver on record with the Commission<sup>33</sup>.

Following, on June 25, 2007, in the proceedings for Docket Nos. RM96-1-027 and RM05-5-001<sup>34</sup> and Order No. 698, FERC adopted NAESB WEQ Standard 011-1.2. In its final rule, FERC included a requirement that pipelines and public utilities subject to the standards file a statement with FERC demonstrating compliance therewith on or before November 1, 2007. A question arose whether the WEQ Standard 011-1.2 applied to a generation facility that uses natural gas only as a start-up fuel, but not otherwise for operation (i.e. the units are not “natural gas-fired electric generating facilities”, at least as the term normally is used). The WEQ Interpretation

<sup>34</sup> [http://www.naesb.org/member\\_login\\_form.asp?doc=ferc101906\\_M3.pdf](http://www.naesb.org/member_login_form.asp?doc=ferc101906_M3.pdf)

Subcommittee passed the interpretation on October 5, 2007. The interpretation was voted on by the Executive Committee on November 6, 2007 and ratified on December 19, 2007.

Next, in revisions to the NERC BAL-004 standard to remove inappropriate requirements on reliability coordinators who voluntarily agree to serve as Interconnection Time Monitors<sup>35</sup>, the NAESB Standards Review Subcommittee requested that the NAESB Business Practice WEQ 006 (Manual Time Error Correction) be reviewed so that the NAESB standard remained complementary to the NERC standard. NAESB modified language in section WEQ-006-4 and 006-5 to allow for variances for the Interconnection Time Monitor to remain consistent with changes made by NERC to BAL-004. This maintenance item was voted of the subcommittee on June 4, 2008. It passed an EC vote on August 19, 2008 and the ratification process will complete on September 22, 2008.

Lastly, on April 21, 2008 in Federal Energy Regulatory Commission Docket No. RM05-5-005 [Commissioner Wellinghoff](#) submitted a concurrence to the Commission's issuance of a Notice of Proposed Rulemaking<sup>36</sup>. In his concurrence, Commissioner Wellinghoff encouraged NAESB and its stakeholders to amend WEQ-001 to avoid any confusion between the FERC Order No. 890 *pro forma* OATT definitions of ancillary service and the WEQ-001 definitions of those same ancillary services<sup>37</sup>. FERC Order No. 890 revised the referenced ancillary service definitions in the *pro forma* OATT to specifically reflect the possible role of demand resources in the provision of the cited ancillary services. The NAESB ESS/ITS and BPS amended the ancillary services as cited in the concurrence which include: reactive supply and voltage control, regulation and frequency response, energy imbalances, spinning reserves, supplemental reserves, and generator imbalances. The amended ancillary services definitions contained in WEQ-001 reflect the definitions contained in the *Pro Forma* OATT as revised by FERC Order No. 890. These modifications included revisions to WEQ-001-2.5.2 through WEQ-001-2.5.7. The recommendation was approved by the WEQ EC on August 19, 2008 and the ratification process will complete on September 22, 2008.

**Standards under development or planned related to FERC Order No. 890 that are not yet complete and will be the subject of either Version 002.1 or 002.2**

There are seven items that are currently under development or planned related to FERC Order No. 890 that are not yet complete and will be the subject of either version 002.1 or 002.2. Of those, two have deadlines. Those items are the ATC information list which is due November 27, 2008 and CBM, which is due February 19, 2009. The other five items, network service on OASIS (included in group 3 of the Order 890 work plan), pre-emption, request R05019 and revisions to standard 9.7 (included in group 4 of the Order 890 work plan), paragraph 1377 of the 2008 WEQ Annual Plan Item 2(a)(v)(1) (included in group 5 of the Order 890 work plan), 2008 WEQ Annual Plan Item 2(a)(vi)(1) (included in group 6 of the Order 890 work plan) and submittal windows (included in group 7 of the Order 890 work plan) do not have deadlines – but are all in standards development or planned for standards development.

For the first deadline item, while working to develop additional business practice standards to support transparency reporting and related functions, the Joint ESS/ITS and BPS developed a list of the ATC information that would be made available as a result of the ATC standards<sup>38</sup>. The NERC ATC drafting team reviewed this list and provided feedback. After review of the work products, the WEQ EC created a task force to address the standards needed to support the ATC information list. The proposed standards were voted out of the WEQ EC task force on August 14, 2008 and were sent out for industry comment on August 18 with comments due September 17, 2008. Once the comment period concludes, the WEQ EC will consider the comments and act on the recommendation.

The second deadline applies to business practice standards which set forth “how the CBM value shall be determined, allocated across transmission paths, and used” and how transmission providers will “reflect the set-aside

<sup>35</sup> *Id.* at 6(a).

<sup>36</sup> FERC Commissioner Jon Wellinghoff, concurring opinion in response to Federal Power Act, 16 U.S.C. §791 (a) (2008), *available at* . [http://www.naesb.org/pdf3/weq\\_atc\\_afc070808w24.pdf](http://www.naesb.org/pdf3/weq_atc_afc070808w24.pdf) (issued April 21, 2008).

<sup>37</sup> NAESB 2008 WEQ Annual Plan Item 6(d), *supra* note 10.

<sup>38</sup> *Id.* at 2(c).

of transfer capability as CBM in the development of the rate for point-to-point”<sup>39</sup>. The proposed CBM business practice standards were voted out of the NAESB Joint ESS/ITS and BPS on July 30, 2008, and is currently out for a formal comment period that ends September 5, 2008. Once the comment period concludes, the WEQ EC will consider the comments and act on the recommendation.

For the first non-deadline item, NAESB is developing OASIS business practice standards and the OASIS technical aspects for “transmission providers and network customers to use OASIS to request designation of new network resources and to terminate designation of network resources”<sup>40</sup>. The standards under development will include the ability to electronically query requests to designate and terminate network resources. The OASIS templates under development will allow for queries of all information provided with designation requests; and the ability to mask information about “operating restrictions and generating costs on OASIS”<sup>41</sup>. The proposed business practice standards are currently under development. For future status updates, please reference the 2008 WEQ Annual Plan<sup>42</sup> and Order 890 work plan<sup>43</sup>. These items relate to group 3 of the Order 890 work plan.

Not started yet, NAESB plans revisions to the OASIS business practice standards and OASIS S&CPs so that “a new confirmed request for transmission service would preempt a request of equal duration that has been accepted by the transmission provider but not yet confirmed by the transmission customer”<sup>44</sup>. The business practice standards to be developed will be coordinated with work efforts related to NAESB Request No. R05019 to modify OASIS standards and OASIS S&CPs to clearly document the procedures used to implement the displacement/interruption terms of the Pro Forma tariff. As part of the development, the NAESB ESS/ITS expects to modify OASIS standards and OASIS S&CPs to clearly document the procedures used to implement the displacement/interruption terms of the Pro Forma tariff. However, NAESB has begun the revisions for NAESB WEQ business practice standard WEQ 001-9.7 (which addresses rollover rights for Redirected transmission service) to be consistent with the Commission policies. For future status updates, please reference the 2008 WEQ Annual Plan<sup>45</sup> and Order No. 890 Work Plan<sup>46</sup>. These items relate to group 4 of the Order 890 work plan.

Following, NAESB will develop business practice standards to facilitate the coordination of requests across multiple transmission system using the principles set forth in Paragraph 1377 of FERC Order No. 890<sup>47</sup>. NAESB will also develop S&CPs related to coordination of request across multiple transmission systems. The target completion date as listed in the Order 890 work plan is 2<sup>nd</sup> quarter 2009. NAESB will develop business practice standards “to allow transmission customer to rebid a counteroffer of partial service so the transmission customer is allowed to take the same quantity of service across all linked transmission service requests.” The effort to develop these business practices standards has not yet started. For future status updates, please reference the 2008 WEQ Annual Plan<sup>48</sup> and Order No. 890 Work Plan<sup>49</sup>. These items relate to group 5 of the Order 890 work plan.

Additionally, NAESB will review the existing business functions set forth in the NAESB WEQ standards to determine if standards should be created or modified as related to Paragraph 1390 of FERC Order No. 890<sup>50</sup>. NAESB expects to develop OASIS business practice standards and OASIS S&CPs for the “posting of additional curtailment information on OASIS” via a “detailed template for the posting of additional information on OASIS regarding firm transmission curtailments.” NAESB will develop business practice standards for redispatch cost

posting which will include OASIS S&CPs to allow for posting of third party offers of planning redispatch services. The business practice standards developed for redispatch cost posting may affect the existing NAESB business practice standards for Transmission Loading Relief (TLR). The proposed business practice standards highlighted here have not yet started. For future status updates, please reference the 2008 WEQ Annual Plan<sup>51</sup> and Order No. 890 Work Plan<sup>52</sup>. These items related to group 6 of the Order 890 work plan.

Lastly, NAESB will develop standardized practices for allocating capacity among requests received during the submittal window<sup>53</sup>. The proposed business practice standards highlighted here have not yet started. For future status updates, please reference the 2008 WEQ Annual Plan<sup>54</sup> and Order No. 890 Work Plan<sup>55</sup>. These items relate to group 7 of the Order 890 work plan.

### **FERC Order No. 890 Items That the Organization Decided Needed No Action As They Were Included in Other NAESB or NERC Efforts**

Several of the FERC Order No. 890 items were deemed to require no standards development action by NAESB as they were included in other NAESB or NERC efforts. When a subcommittee determines that no action is to be taken on a particular item, that item is posted for a 30 day industry comment period. The EC reviews any comments submitted and the item must pass a simple majority vote. Items for which no action is required do not require membership ratification, as that process is reserved for creations of, modifications to or deletion of existing standards. There are six standards development items that required no action by NAESB: data exchange for ATC modeling, transmission reserve margin (TRM), ATC and AFC calculation methodologies, CPS to complement a NERC supplemental SAR and the remaining requirements documented in R05004 and R05004A.

First, possible business practice standards were discussed to address issues regarding data exchange for ATC modeling complementary to the related NERC reliability standards including any OASIS posting requirements to achieve the data exchange<sup>56</sup>. It was determined that NERC will define the data to be exchanged while NAESB will identify any new OASIS posting requirements or template query requirements which are needed in order to facilitate data exchange for ATC modeling. The NAESB ESS/ITS and BPS recommended no action for this proposed business practice standard as it is to be addressed in NERC standards. The EC approved the no action recommendation on May 13, 2008.

Second, possible business practice standards were discussed to complement the NERC reliability standards for TRM<sup>57</sup>. After review of the NERC reliability standards and the requirements of paragraphs 272 and 273 of FERC Order No. 890<sup>58</sup> the joint subcommittees recommended that no action was necessary because these items were addressed in the ATC Information Link & ESS/ITS's Group 1 (conditional firm service, annotations for ATC, load forecast and actual load, rebid of partial service, and preconfirmation priority). The WEQ approved the no action recommendation on August 19, 2009.

Third, possible business practice standards were discussed to address the frequency and posting requirements for all ATC components that are complementary to the related NERC reliability standards<sup>59</sup>. After review of the NERC reliability standards and the requirements of paragraph 301 of FERC Order No. 890<sup>60</sup> the joint subcommittees recommended that no action was necessary because this item was addressed in the ATC information link and FERC Order No. 890 modifications to WEQ-008 (with minor corrections applied February 27, 2008). The NAESB Executive Committee (EC) accepted the recommendation for no action on August 19, 2008.

Next, possible business practice standards were discussed to complement NERC reliability standards for transfer capability in response to a NERC supplemental standards authorization request (SAR), revisions to existing

<sup>58</sup> FERC Order No. 890, *supra* note 4 at ¶¶272-73.

<sup>59</sup> NAESB 2008 WEQ Annual Plan Item 2(b)(v)(1), *supra* note 10.

<sup>60</sup> FERC Order No. 890 *supra* note 4, ¶301.

standards MOD001-MOD009, FAC12-13<sup>61</sup>. The NAESB ESS/ITS and BPS coordinated efforts with the NERC ATC drafting team and on May 1, 2008, and determined no additional standards were required from NAESB. After review of the ATC information link and discussing the issue with NERC, the NAESB subcommittees recommended no action for the proposed business practice standard. The NAESB EC accepted the recommendation for no action on August 19, 2008.

Following, standard request R05004 was originally submitted by the NERC ATC drafting team on December 12, 2005, and was subsequently revised on August 8, 2006, to reflect potential requirements which have since been superseded by FERC Order Nos. 890, 890-A and 890-B. The ESS/ITS and BPS recommended no action for the request as the actions expected from this request are addressed in the Order 890 work plan. The NAESB Executive Committee (EC) accepted the recommendation for no action on August 19, 2008.

Lastly, a no action determination was made for WEQ annual plan item no. 3(a)(vi)(1) – for representation of pre-Order No. 888 (“grandfathered”) transmission and ancillary services in OASIS. The no action determination was taken as this annual plan item is addressed separately as part of the standards development efforts for ETC as part of the Order 890 work plan. The issue was discussed during three ESS/ITS and BPS meetings, before the no action recommendation was voted out of the subcommittees. The NAESB EC accepted the recommendation for no action on August 19, 2008.

### LIST OF NEW STANDARDS, STANDARDS MODIFICATIONS AND INTERPRETATIONS FOR VERSION 002

**Request Cross Reference:**

The request cross reference lists each standard either modified or created in Version 002, its description, the request that instigated the change, and a brief description of the change itself. If the change was originated through a minor correction, the date of the minor correction is given. The table is sorted by standard numbering shown below. If a standards manual is noted, it is for the set of standards that directly follow and is indicated by the series of standards within the manual.

The standards follow a numbering convention which is x-y.z(n):

- x                    standard number and topic
- y                    subordinate category or section
- z(.n)                optional further subordinate sections for granularity
- A-G, P or M        optional:
  - A - (Appendix A or examples)
  - B - (Appendix B)
  - C - (Appendix C)
  - D - (Appendix D)
  - E - (Appendix E)
  - F - (Appendix F)
  - G - (Appendix G)
  - P - Principle
  - M - Model

|   |                                  |  |
|---|----------------------------------|--|
| x | Business Topic – Standard Number |  |
|   | 001                              | OASIS  |
|   | 002                              | OASIS Standards and Communication Protocols (S&CP) |

**Version Cross Reference:**

The Version Cross Reference lists each NAESB standard number followed by four columns. The column entitled "Adopted" identifies for which version the standard was adopted. The column entitled "Revised" identifies versions where the standard was revised. The column entitled "Interpreted Version" identifies versions where the standard was interpreted. The last column "Interpretation Number" identifies the interpretation number for the version specified in the previous column. The language of the standards themselves can be accessed from the NAESB home page ([www.naesb.org](http://www.naesb.org)). With the Version Cross Reference, a determination can be made of all standards that were created, changed or interpreted for a given version.

For standards that were created in Version 002, the "Adopted" column will contain the value "002." For standards that were modified in Version 002, the "Revised" column will contain the value "002." A standard may have multiple revisions specified. For standards that were interpreted in Version 002, the "Interpreted Version" column will contain the value "002" and the "Interpretation Number" column will contain the related interpretation number. There were no interpretations processed for Version 001. A standard may have multiple interpretations specified.

The versions noted in the version cross reference are:

Version 000                      January 15, 2005

Version 000 NAESB WEQ Standards were published on January 15, 2005. Those standards that were federally jurisdictional were submitted to the Federal Energy Regulatory Commission on January 18, 2005. The Version 000 standards were the subject of a FERC Rulemaking, Order No. 676, Docket No. RM05-5-000, issued on April 25, 2006, and Order No. 676-B, Docket No. RM05-5-003, issued on April 19, 2007.

Version 001                      October 31, 2007

Version 001 NAESB WEQ Standards were published on October 31, 2007. Those standards that were federally jurisdictional were submitted to the Federal Energy Regulatory Commission on January 18, 2005. The Version 000 standards were the subject of a FERC Rulemaking, Order No. 676-C, Docket No. RM05-5-005, issued on July 21, 2008.

Version 002                      September 30, 2008

Version 002 NAESB WEQ Standards will be published on September 30, 2008. Those standards that are federally jurisdictional were submitted to the Federal Energy Regulatory Commission on August 29, 2009.
