The Administration's Economic Strategy
Our economic strategy has been straightforward. First, we have pursued deficit reduction to increase the share of the Nation's economic resources available for private investment. At the same time we have reoriented the government's public investment portfolio with an eye toward preparing our people and our economy for the 21st century. We have cut yesterday's government to help solve tomorrow's problems, shrinking departments, cutting unnecessary regulations, and ending programs that have outlived their usefulness. We have also worked to expand trade and to boost American sales to foreign markets, so that the American people can enjoy the better jobs and higher wages that should result from their own high-quality, high-productivity labor. Having fixed the fundamentals, we are now proposing what I call the Middle Class Bill of Rights, an effort to build on the progress we have made in controlling the deficit while providing tax relief that is focused on the people who need it most.

Putting Our Own House in Order

The first task my Administration faced upon taking office in January 1993 was to put our own economic house in order. For more than a decade, the Federal Government had spent much more than it took in, borrowing the difference. As a consequence, by 1992 the

FERC Order 714

Order Highlights:

The Federal Energy Regulatory Commission is revising its regulations to require that all tariffs and tariff revisions and rate change applications for the public utilities, natural gas pipelines, oil pipelines and power administrations be filed electronically according to a set of standards developed in conjunction with the North American Energy Standards Board. This rule is part of the Commission’s efforts to comply with the Paperwork Reduction Act, the Government Paperwork Elimination Act (GPEA), and the E-Government Act of 2002 by developing the capability to file electronically with the Commission via the Internet. Electronic filing reduces physical storage space needs and document processing time, provides for easier tracking of document filing activity; potentially reduces mailing and courier fees; allows concurrent access to the tariff filing by multiple parties as well as the ability to download and print tariff filings; and provides automatic e-mail notification to an applicant of receipt of the filing and whether or not it has been accepted. Upon implementation of this rule, the Commission will no longer accept tariff filings submitted in paper format.
General Filing Process

1. Company X Creates XML Package
2. User (eRegistered) Logs in to FERC's eFiling Web Portal
3. User Selects eTariff Filing Type and Provides Company Log-in
4. User uploads XML Package
5. Email to User and Company X stating filing received (timestamped)

- eTariff Verification
  - Pass
    - Email to POC in XML package and Company X noting success
    - SOC Review
      - Accept
        - Filing Docketed, data loaded into eLibrary and other Systems
      - Reject
        - Email to POC in XML package and Company X: Filing Rejected
    - XML Readable
      - Email to User and Company X noting failures
      - XML Corrupted
        - Email to User and Company X noting failures

- Determine eMail for Fail Notice
- FERC Program Office Review of Tariff Changes Starts

Creating a Submittal

- Create from "clipboard" contents
- Manage Filing Metadata
- Manage Attachment Metadata
- Manage Record Metadata
Submittal Management

- Add Attachments & Records
- Update Submittal Metadata
- Control Order of Submittal Content
Functional Highlights

- Documentum performing inherent functionality as content repository
- Virtual document – “virtual binder” – representing each submittal
- Submittals can be frozen after approval to track what was in a submittal
- Documentum workflow mechanism manages routing and notification out of the box
- Documentum process integration provides FTP and SMTP integrations
Benefits of Documentum eTariff Solution

- No additional third-party software to install
- Can be added onto existing Documentum implementations
- Minimal additional training; no new applications to learn
- Depending on existing EMC products, limited to no additional products to purchase
- Documentum auditing can be enabled to track changes to tariffs, associated documents, and workflows
Thank You!
