

Iroquois Gas Transmission System, L.P.

NAESB WGQ BPS Meeting Workpaper

Request: R24006

Example of need for Off-System Indicator field

Contracts

	Contract Holder	Contract Number
On Iroquois' System:	A	111
	B	222
	B	333
	C	444
	Z	999999

On Interconnect's System:	E	333
	C	444
	D	555
	F	666

(also added to Iroquois system specifically for use in Up K/Dn K fields)

C	777
---	-----

Nomination Scenarios (Pathed Non-Threaded):

Dn Name	Dn K	Quantity	Off-System Downstream Contract Indicator
A	111	500	No
B	222	1,000	No
B	333	1,500	No
C	444	2,000	???
C	777	2,500	Yes
E	333	3,000	Yes
D	555	3,500	Yes
F	666	4,000	Yes
TOTAL		18,000	

The orange highlighted row is where an off-system indicator would be required to determine appropriate contract intended to be pointed to. If a Dn K is intended to point to a contract on an interconnecting pipeline, Iroquois needs to know this so it shows up on the confirmation screen for that operator.

Note: On Iroquois, for most transactions the Transaction Type is typically '01' (Current Business) and the contract type setup in Iroquois system will help determine whether this will appear on the confirmation screen.

Open Question: If NAESB doesn't standardize this field, can Iroquois use the Nomination User Data 1 field (Mutually Agreeable field) and force shipper's to use it since Iroquois needs that data?
